

Commitment to Environmental Awareness

As a premier paper converter, Holmberg Company, Inc. is committed to responsible stewardship and environmentally sound practices. Our commitment is represented by utilizing the following methods.

1. Recycle and reclaim waste
2. Increased awareness and improvement for more energy efficient operations
3. Employee awareness and training of our ongoing environmental initiatives

Holmberg Company, Inc. has earned the Forest Stewardship Council® (FSC) chain-of-custody (BV-COC-080902), and Sustainable Forestry Initiative® (SFI) certification, (BV-SFICOC-US 08000412). To these ends, Holmberg Company will use the following processes:

Recycle and reclaim waste streams

Aluminum, Metals, Plastics and Cardboard

Plant wide baling/shredding system that collects and bales all paper and film process waste for recycling.

Collect, reclaim and recycle all converted paper waste

Improve Energy efficiency throughout our operations, reduce VOC's

Use nightly and weekend set backs; specify premium efficiency motors for new mechanical/electrical installations

Reduce electrical requirements through continuous improvement efforts

Find and use low VOC products wherever practical

Increase employee awareness of our environmental initiatives and train

Fully implement employee training programs and seek continuous improvements with regard to any process that may have environmental impact.

Develop internal audit procedures that monitor these training and continuous improvement processes regularly.
